

Presentation of ASEAN Action Plan on Fall Armyworm

Dr Alison Watson
FAW Manager, Grow Asia
October 29, 2020

GrowAsia

ASEAN ACTION PLAN ON FALL ARMYWORM

Flagship Projects:

Biocontrol Opportunities with IPM

Develop capacity for improving the capability and use of biocontrol within the region.

Also,

Regional Resistance Management Plan

Objective: To develop a regional resistance management plan to ensure that farmers maintain access to a range of effective technologies and options in the IPM toolbox.

Technology Transfer

Explore the potential of innovative public-private partnerships for scale-up of technology transfer

Regional Innovation & Knowledge Hub

Central point of contact to grow a community of learning across Southeast Asia

Biocontrol Webinar Series

Webinar 1 :

Classical Biocontrol

Webinar 2:

Biopesticides

Webinar 3:

**Augmentation and
Conservation**

Introductory Webinars Series: Biocontrol

Biocontrol 1 & Biocontrol 2 & Biocontrol 3

- Registrants: 1452 registered
- Attendees: 700+ attended
- Watched recording: Over 900 views
- **Webinar 1:** [Intro to Biocontrol and Classical Approaches](#)
- **Webinar 2:** [Biopesticides](#)
- **Webinar 3:** [Augmentation and Conservation](#)

GrowAsia

ASEAN ACTION PLAN ON FALL ARMYWORM

Technical Workshop Series:

Open registration. Focus is on practical tips and discussion

CABI Collaborative Portal on FAW will facilitate ongoing interaction

- 🔍 **Session 1:** Effective biopesticide trials – November 2020
- 🔍 **Session 2:** Field collection and identification of FAW parasitoids and predators – December 2020
- 🔍 **Session 3:** Rearing of parasitoids and predators – December 2020
- 🔍 **Session 4:** Selection of effective parasitoids and predators for mass production – January 2021
- 🔍 **Session 5:** Organization for production and release of parasitoids and predators - February 2021
- 🔍 **Session 6:** Production of biopesticides - March 2021
- 🔍 **Session 7:** Farmer acceptance of biocontrol approaches and scale-up and business opportunities – April 2021
- 🔍 **Session 8:** Biocontrol as part of an IPM Approach – April 2021
- 🔍 **Workshop:** TBA – May 2021

ASEAN ACTION PLAN ON FALL ARMYWORM

A close-up photograph of a person's hands holding a large, green corn leaf that has been severely damaged by insect feeding. The leaf is riddled with numerous holes and irregular holes. A small, brown caterpillar is visible on the leaf. The person is wearing a blue and white checkered shirt and a silver watch. The background shows a field of corn plants and reddish-brown soil.

Biocontrol Programme

- Education and capacity-building
- Research and technology transfer
- Regulatory environment
- Field application
- Working with farmers

A close-up photograph of a hand holding a large green corn leaf. On the leaf, there is a small, brown, curled snail and several small, yellowish-brown insect larvae or eggs scattered around it. The background shows a blurred field of corn plants.

Working together

ASEAN FAW Action Plan welcomes working with other countries and stakeholders across Asia Pacific
